U.S. v. AVX Original
Litigation Document

Mr. Norman Butterworth
Aerovox, Inc.
740 Belleville Avenue
New Bedford, MA 02745

Dear Mr. Butterworth:

This letter addresses final approval for compliance with EPA's Consent Order No. 81-964 for remedial action on Aerovox property. In a previous letter, EPA conditionally approved completion of the work, the condition being satisfactory repairs to an approximate 20 foot crack. On November 2, 1984, the EPA conducted an inspection of the repairs and found that a second coat of repairing material would be necessary. Present at this inspection were Jackie Prince of EPA, John Gushue of GHR and Bob Okem of Aerovox.

As the pavement cracking may be a chronic problem, ^{EPA} ~~and we~~ will allow Aerovox the option of addressing the repairs in their long term maintenance and monitoring program. Aerovox should submit, in writing, their intentions of either continually maintaining the crack or finding a permanent remedy no later than May 1, 1985.

Our office is internally reviewing the final order including ~~the~~ post-closure monitoring plan for Aerovox. If you have any questions, feel free to contact Jackie Prince of my staff at (617) 223-1724.

Sincerely,

John R. Moebes, Chief
Superfund Branch
